

ANSHU AYUSH

Software Development Engineer | Backend Engineer

☎ +91-8638026830 | ✉ anshuayush2002@gmail.com | in [linkedin.com/in/anshu-ayush](https://www.linkedin.com/in/anshu-ayush) | 📍 Bengaluru, KA

PROFESSIONAL SUMMARY

Backend-focused Software Development Engineer with **3.5+** years of experience building and modernizing enterprise-grade systems at JP Morgan & Chase. Hands-on experience designing Java/Spring Boot microservices, REST and GraphQL APIs, SQL and NoSQL data stores, Kafka-based event streaming, distributed caching, CI/CD pipelines, and scalable, highly available, resilient systems. Experienced across the full software development lifecycle, from design and development to testing, deployment, and production support. Led enterprise-scale database migration and API modernization initiatives, delivering measurable improvements in performance, reliability, and operational efficiency.

CORE SKILLS

Languages: Java, Python, C++, JavaScript

Frameworks & ORM: Spring Boot, Spring MVC, Spring Security, Spring Cloud, Spring Data JPA, Spring Kafka, Spring Boot Actuator, Hibernate, JDBC, Maven, React

APIs & Architecture: REST APIs, GraphQL, Microservices, Kafka, OAuth2, JWT, Event-driven Architecture, Distributed Systems

System Design & Architecture Patterns: Domain-Driven Design (DDD), Design Patterns, High Availability (HA), Fault Tolerance, Horizontal Scalability, Distributed Caching, API Gateway, Service-Oriented Architecture (SOA), Data Mesh, Message Queues, Circuit Breaker Pattern

Databases: PostgreSQL, Microsoft SQL Server, MongoDB, DynamoDB, Redis, MySQL, Cassandra, Sybase ASE

Cloud & DevOps: AWS, JPMC Private Cloud (Gaia), Docker, Jenkins, CI/CD Pipelines

Monitoring & Observability: Splunk, Dynatrace, Grafana, Application Performance Monitoring (APM)

Practices: Agile/Scrum, Root Cause Analysis, End-to-End Ownership, Stakeholder Management, AI-Assisted Engineering (ADLC, MCP)

PROFESSIONAL EXPERIENCE

Software Development Engineer - JP Morgan & Chase

Jun 2023 – Present

- Led end-to-end migration of enterprise database workloads from Sybase ASE to Microsoft SQL Server, remediating **120+** stored procedures and validating deployments across **8** global regions, reducing memory utilization **25%** and improving query performance up to **30%**.
- Modernized **10+** microservices from Java **8** to Java **21** and upgraded Spring Boot versions, improving maintainability, security compliance, and long-term platform support while ensuring seamless production releases.
- Migrated **25+** REST API integrations to strategic GraphQL and Data Mesh platforms, reducing legacy data source dependency by approximately **70%**.
- Designed and implemented large-scale data reconciliation frameworks, validating millions of records to ensure accuracy and consistency across platform migrations.
- Diagnosed application and database performance bottlenecks using Dynatrace and query-plan analysis, driving infrastructure optimization that cut resource consumption **20–25%**.
- Reduced Mean Time to Resolution (MTTR) **35%** by building observability pipelines with Splunk, Dynatrace, and Grafana across mission-critical production systems.
- Resolved **50+** production incidents spanning distributed systems, database performance, and API failures through root cause analysis and advanced debugging.
- Remediated **20+** security vulnerabilities using an AI-assisted engineering workflow (ADLC), cutting manual investigation effort **30%** and accelerating release cycles.

Software Development Intern - Bytelearn.ai

Jul 2022 – Dec 2022

- Built an AI-powered educational chatbot (Python, Jinja2) from prototype to production, lifting student engagement **30%** and cutting content-update effort **50%**.
- Developed and deployed RESTful backend services enabling real-time student interactions in a fast-paced startup environment.

EDUCATION

Bachelor of Technology, Computer Science and Engineering

KIIT University | 2019 – 2023 | CGPA: **8.9/10**
